MEDIPLAST ENT PRODUCTS

The Mediplast ENT products are the leading single use choice when you are looking for a vast range of suction tips and disposable accessories. Our motto is:

High quality - Safe products - Easy and Fast

Doctors all over the world prefer the Mediplast products for numerous reasons;

- **Guaranteed clean and sterile**
It is time consuming and very difficult to clean the reusable suction instruments. There is a clear trend all over the world to use single use products in healthcare in order to have a better quality control and avoid cross infections.
- **Cost efficient**
Only the “real” price of cleaning and re-sterilizing a reusable tool (not even the cost of the tool included) compared to using a disposable one, is often higher than the Mediplast disposable products.
- **Specially designed for ENT examination and surgery**
The Mediplast metal and plastic suction tips were designed in close collaboration with ENT doctor’s. Important features are the angle of the suction tips, which enables the doctor to have a free view through the microscope and the suction control handle connector that facilitates quick change of suction tips during surgery.

Otology

PREFORMED SINUS CATHETER MEDIPLAST®

Post Operative Maxillary Sinus Flusher

6066505	Sterile Preformed Sinus Catheter
---------	----------------------------------

ENT ACCESSORIES

PRE CUT TUBES

Medioplast Suction Tubes, DEHP-free PVC, pre cut, available in 2,0 m and 3,5 m lengths, comes with female-female connectors, or female-plastic suction tip connector, or female- extension connector (for suction control handle).

Medioplast suction tubes offer a very supple and soft feel for doctors who work with long operational procedures, but still are resistant to collapse from the vacuum.

FLUSHER SYRINGE (SJECT), 100 ML

A multi purpose tool with an easy “one hand grip” usage. Use for instance for flushing of wounds, for flushing ears, and also a perfect match for our Antrum Irrigation Set.

HOSPITAL APPLICATORS

Cotton sticks, available with aluminum or stainless steel shaft. Used for applying salves and cleaning of the ear canal. Also now available in a sterile version, 5pcs per peel-pouch, (only stainless steel) to be used during ENT Surgery.

TUBING ON ROLL

Medioplast can offer DEHP-free PVC tubes on roll with ID's from 4 mm to 10 mm and OD's from 6mm to 12mm in lengths of 30, 40 and 50 m pending on diameter size. This tube easily fed through a round top lid and cut to desired length.

MEDIPLAST EAR FLUSHING TIP / NOZZLE

A handy tool connected to the conical end of the Flusher Syringe, used for instance when flushing ears, it has a plate on the cone which prohibits the cone to enter too far into the ear canal.

VACUTIP™

A single-use, non-sterile suction device designed to safely and easily remove difficult foreign objects from the ear and nasal cavities. The suction cup conforms to almost any shape and works with a standard suction tubing and system. It fits on all Medioplast 2 mm diameter Metal suction tips, enabling easy handling.
